

HG

Features

The HG type lightweight steel wire rope isolator features broadband vibration isolation, high damping, and large deformation cushioning. It has a stable structure, high load capacity, and is corrosion-resistant and temperature-tolerant. It is easy to install and maintain. It is suitable for vibration isolation requirements of complex environments and a variety of equipment, such as vehicle-mounted hard drives, small vehicle-mounted devices, small ship-mounted devices, and drones.

Technical Data

Type	Model No.	Normal Load (kg)	Installation Dimensions (mm)			
			W	H	A	M
HG	24-36	1.7-3.6	26	24	16	M5
	26-17	0.9-1.7	28	26	16	M5
	28-11	0.55-1.1	32	28	16	M5
	23-47	2.4-4.7	32	23	16	M5
	26-28	1.3-2.8	35	26	16	M5
	26-88	4-8.8	42	26	20	M6
	31-45	2.3-4.5	47	31	20	M6
