

JJ

Features

The JJ series elastomer vibration isolators feature low-frequency vibration isolation, good damping, multidirectional vibration reduction, adjustable shape and stiffness, flexible installation, lightweight and cost-effective, oil and water resistance, temperature tolerance, and long service life. However, they have relatively weaker performance in high and low temperature resistance and aging resistance.

Technical Data

Type	Model No.	Rated Load (kg)	Z-Axis Deformation (mm)	Damping Ratio (C/Cc)	Temperature (°C)	Weight (kg)
JJ	10	10	1-2.2	0.04	-40~+50	0.001
	40	40				0.01
	30	30				0.015
	60	60				0.05

Installation Dimensions (mm)

Type	Model No.	H	H1	D	d	d1	R
JJ	10	9	5	14	3.2	7	1.5
	40	13	7.5	28	4.2	9	2
	30	18	11	32	5.5	11	2
	60	25	12	50	6.5	13	5
